

Precision High Performance Mold Manufacturing and Design

Welcome to our website. Its intent is simple... to show how our **mold manufacturing services** can maximize your potential of success in a global Market. We invite you to explore the website to see how we can help you achieve your goals, by offering **molder friendly** engineering that will match your program needs with the right solutions.

Precision Injection Mold Building and Design

American Tool & Mold is a leader in the design and construction of complex, precision, **multi-cavity molds** for the **plastic injection molding** industry. We provide thin-wall, stack, hot runner, unscrewing and two-shot molds built with the latest methods and technologies available.

ATM's unique, **molder-friendly** approach sets us apart from the competition. We bring you a combination of the best resources available; high technology [equipment](#), [quality](#) workmanship, and [program management](#) and product development techniques that are flexible enough to meet the needs of one-of-a-kind, **multiple cavity** and **multiple mold** programs alike.

**Register for our Free Molder Friendly Seminar
Sand Key, Fla. - Sept 30th through Oct 2, 2008**
